Sharing energy data for the better

Sharing energy data for the better

The Rotterdam Open Energy Hub/OEHU is a public, open-source, distributed database for smart meter data. Users can contribute their data and in return gain access to a personal energy usage dashboard, detailed datasets from all contributors, and cloud-based data analysis tools.
Sign up for a personal dashboard
How doe it work?
The primary goal of the Lab/Hub is to make energy data

Dashboard data!

It's works great!

Thank you

Bedankt
